Jess,

Here is a follow-up from the Corps regarding the email I sent to you earlier today regarding CGP coverage.

We are working with Joe Redlinger of our Real Estate Division on determining the status of this site. Regulatory has not yet provided him with the results of the site visit. I recommend that you work with Joe as this could be a confusing and complicated situation. Crystal is our Regulatory project manager on this.

Karen

Subject: Proposed US Army Reserve Military Construction Project, 103 and 135

East Washington St, North Attleborough, MA wetland inquiry

EPA received a letter from the Department of the Army, Headquarters, 99th Regional Support Command in Fort Dix, NJ, informing us of the preparation of an Environmental Assessment for the proposed construction and operation of an Army Reserve Center to be located in North Attleborough, MA. The letter is attached. The address of the parcel is listed as 103 and 135 East Washington Street in North Attleborough which had a file number MA DEP 243-0722 dated 8/8/2008 by David Canata of North One Development Corp.

It appears from current birds eye photos of the site on Google Maps or Bing that soils have been imported to the site disturbing vegetation on the site.

Can you please inform me what you know of the activity on this site to date and if the soil importing activity is legal or not,

Was a SWPPC permit applied for at this location sometime around 8/8/2008.
